-GIT

## Reference

Upon request

## EXPERIENCES:

### Software Developer

**CIMPLEX Solutions Inc.**

**June 2022 - June 2024**

- **System Optimization and Database Management:** Strategize and implement system optimizations to enhance efficiency, including proficient management of databases.
- **Issue Assessment and Troubleshooting:** Conduct thorough assessments and swiftly troubleshoot system issues to ensure seamless operation.
- **Technology Stack Expertise:** Leverage a versatile technology stack encompassing PHP with CodeIgniter framework, HTML, CSS, MySQL, and WordPress for comprehensive development solutions.
- **Hosting Management:** Assume responsibility for the seamless hosting of web applications, ensuring reliability and accessibility.
- **Feature Maintenance and Enhancement:** Proactively maintain and enhance system functionalities, incorporating advancements such as batch uploading, additional forms, SMS API integration, and comprehensive reporting features.

### Freelance Web Developer

**2019 - Current**

- **Freelance Application Development:** I specialize in creating and developing applications tailored to client requirements.
- **Languages and Frameworks:** Proficient in PHP, HTML, CSS, JavaScript, and jQuery, utilizing the CodeIgniter/Laravel framework for efficient development.
- **Database Management:** Skilled in using MySQL for effective database management.
- **Hosting Management:** Responsible for handling the hosting and server setup for the websites I create.
- **Project Scope:** Open to small projects, including eBook development.
- **End-to-End Solutions:** Capable of building and deploying web applications from the ground up, ensuring a comprehensive development process.

### Software Developer

**Synxcel**

**March 2023 - Current**

- **Troubleshooting and Maintenance:** Diagnose and resolve issues with software to ensure optimal performance.
- **Develops required software**
- **Unit Testing and Quality Assurance.**
- **Planning and process visualization**
- **Software maintenance and feature upgrades.**
- **System Management:** Maintain and manage computer systems to ensure reliability and efficiency.
- **Ticketing System Management:** Efficiently handle and resolve technical issues through a ticketing system, ensuring timely responses and solutions.
- **Workstation Setup:** Manage requests for workstation setup and configuration, customizing setups to meet the specific needs of accounts or clients.
- **Client Uptime Assurance:** Strive to provide zero downtime for clients, enhancing their productivity and operational efficiency.
- **Continuous Improvement:** Proactively identify areas for improvement in system performance and client support processes.
-
